

uciskowych kończyny górnej (Effectiveness of low-invasive methods in the operative treatment of compression neuropathy of the upper limb.)

Poznań: Ośrodek. Wydaw. Nauk. 2005

ISBN 83-7314-023-9

In this monograph I have proved a clinical efficiency of low-invasive methods in the operative treatment of neuropathy. I have demonstrated the justifiability of the application of provocative tests in the diagnostics of nerves diseases, based on the notion of sensitivity and test specificity.

In 2009 I presented a scientific monograph

Neuropatie uciskowe nerwów kończyny górnej (Compression neuropathy of nerves of the upper limb).

Warszawa : Wydaw. Lek. PZWL, 2009.

ISBN 978-83-2003-999-3

This is the first in Poland monograph dealing with a comprehensive treatment of compression neuropathy of the upper limb, both operative and non-operative, based on the aspect of nerves' compression also on the level of a cervical spine. Academic authorities in the field of orthopedics, who reviewed this monograph, unanimously stressed that:

This is the first in Polish literature such an extensive monograph written in a clear and intelligible way, not only for orthopedists and surgeons, but also for doctors of other specialities and students. Views on pathology and treatment are in accordance with current recommendations of scientific associations dealing with this discipline.

These two listed above scientific monographs: *Effectiveness of low-invasive methods in the operative treatment of compression neuropathy of the upper limb (Skuteczność metod maoinwazyjnych w operacyjnym leczeniu neuropatii uciskowych kończyny górnej)* and *Compression neuropathy of nerves of the upper limb (Neuropatie uciskowe nerwów kończyny górnej)* are my scientific achievements in accordance with art.16 (2) of the law of 14 March 2003 on scientific degrees and academic title in the scope of art (J/L No. 65, item 595, J/L 2005 No. 164, item 1365 and J/L 2011 No. 84, item 455)
